

MISSION STATEMENT OF SCHOOL OF PHARMACY

In January 2003, the faculty of the School of Pharmacy adopted new mission and vision statements for the school that were reaffirmed when the strategic plan was revisited in January 2006:

The School of Pharmacy provides individuals with undergraduate, professional, graduate, and continuing education programs in pharmacy practice and pharmaceutical research. The outcome of the School's educational, research, and service activities shall be the improvement of human health through the discovery and dissemination of knowledge in the many aspects of contemporary pharmacy.

The School of Pharmacy will be regarded by its peers and other stakeholders as one of the best schools in professional pharmacy education and graduate pharmaceutical education and research. It will be the school of first choice for the most qualified prospective regional and national students. Our graduates will be highly sought after for positions in practice, teaching, and pharmaceutical research. The School will take full advantage of our Connecticut location to enter into strategic partnerships with local pharmaceutical and health care entities to develop innovative, high-quality learning experiences and to promote research and extramural funding opportunities.
